PROFESSIONAL SUMMARY

Versatile and results-driven Senior Engineer with over 8 years of cross-functional expertise bridging cloud infrastructure, systems engineering, and modern web development. Proven track record in designing resilient microservice architectures, automating CI/CD pipelines, and building responsive, user-centric web applications. Adept at optimizing system performance, scaling infrastructure, and bridging technical gaps between operations and software development teams.

PROFESSIONAL EXPERIENCE

Lead Systems & Infrastructure Engineer Nexus Cloud Solutions | San Francisco, CA

2023 – Present

- Architected and deployed multi-region AWS Kubernetes (EKS) clusters supporting high-traffic microservices, achieving 99.99% system availability.
- Designed infrastructure-as-code (IaC) templates using Terraform and Ansible, cutting provisioning time for enterprise client environments by 65%.
- Implemented centralized monitoring and logging using Prometheus, Grafana, and ELK stack, reducing Mean Time to Detection (MTTD) by 40%.
- Partnered with frontend and backend developers to design API gateways and service meshes (Istio) for scalable web platforms.

Senior Full-Stack Web Developer Vanguard Tech Innovations | San Jose, CA

2020 – 2023

- Spearheaded development of a real-time data visualization dashboard using React, TypeScript, and Node.js, utilized by over 100k active daily users.
- Refactored legacy monolithic web application into modern React/REST API architecture, improving client page load times by 55%.
- Integrated WebSockets and GraphQL APIs for seamless live data streaming and state management across enterprise web applications.
- Managed end-to-end web deployment pipelines using Docker, GitLab CI, and AWS S3/CloudFront.

Systems Administrator & Web Engineer Apex Digital Media | Austin, TX

2017 – 2020

- Maintained Linux/Unix web server fleet (Nginx/Apache), managing security patching, SSL certificates, and server hardening.
- Developed custom PHP/Laravel web portals and internal automation tools to streamline content deployment and database synchronization.
- Automated daily database backup and failover recovery procedures for PostgreSQL and MySQL clusters.

HIGHLIGHTED HYBRID PROJECTS

Cloud Native Web Monitoring Suite

Open Source

- Built an open-source web application (Vue.js + Go) for monitoring distributed server health and automated alert dispatching via Webhooks.

TECHNICAL CORE

SYSTEMS & DEVOPS

Linux/Unix (RHEL, Ubuntu)
Docker & Kubernetes (EKS)
Terraform & Ansible
AWS, GCP, Hybrid Cloud
CI/CD (GitHub Actions, GitLab)
Nginx, HAProxy, Service Mesh

WEB DEVELOPMENT

TypeScript, JavaScript (ES6+)
React.js, Next.js, Vue.js
Node.js, Express, Python (FastAPI)
HTML5, CSS3, Tailwind CSS
RESTful APIs, GraphQL, WebSockets

DATABASES & TOOLS

PostgreSQL, MySQL, Redis
MongoDB, Elasticsearch
Git, Prometheus, Grafana

KEY COMPETENCIES

Distributed Systems

Cloud Architecture

Full-Stack Dev

Microservices

Site Reliability (SRE)

Performance Optimization

API Design

CERTIFICATIONS

AWS Solutions Architect

Amazon Web Services (2023)

Certified Kubernetes Administrator (CKA)

Cloud Native Computing Foundation

Meta Front-End Developer Specialization

Meta / Coursera

EDUCATION

B.S. in Computer Science

University of California, Berkeley
Graduated 2017
